

## Collective Worship Overview

At Sandringham Primary School, we feel that daily collective worship benefits the school and whole community by developing a sense of belonging. It can add value to the education process by encouraging children to develop their awareness of the universal principles of right and wrong, justice, fairness and concern for the fate of others and the world. During this time, children are able to consider and reflect on their spiritual, moral, social and cultural development and deliberate over current world affairs and issues.

To ensure that a quality experience is provided, we believe that collective worship should be well planned and effectively led. At Sandringham we have a theme each week, we also link this to one of our values, these include:

- stretching the mind
- enriching the imagination
- stretching the body
- encouraging the will to do good
- nourishing the spirit
- opening the heart to others

We also link in one of our learning behaviours. These include:
